The firm are practical workers as well as thorough business men and are deserving of the success which has attended their efforts. Call and examine their stock at 26 West Milwaukee street. Read their ad in another column.

The Weather.

At seven o'clock this morning the thermometer indicated 61 degrees above zero. Cloudy, with north wind. At 1 o'clock p. m. the register was 72 degrees above zero. Cloudy with west wind. For the corresponding hours one year ago, the register was 63 and 84 degrees above zero.

A Tonic in the True Sense of the Word.

Not all medicinal preparations called tonics are such. A mere stimulant of appetite, which gives a "fillip to Nature," which removes no obstacle to her processes in the human system, is in no true sense a tonic. Hostetter's Stomach Bitters not only furthers in purity the ordinary unobstructed action of commerce, the cheap food and beverage and eye openers vend as tonics, but where they are powerless to do more than impart a temporary stimulus to appetite, they are a dangerous digestion, remedying and restoring regularity in the habit of body. It is, therefore, a tonic in the true sense of the word, for does it not renew harmony of tone in the most important functions of the body, where all before was discord, feeble and unharmonious? Besides this its invigorating and regulating effects constitute it the best possible safeguard against malarial diseases. It cures rheumatism, kidney complaints and nervousness.

## A VETERAN'S LOGIC.

What means this modern notion that's growing day by day? This notion, please, about the "blue and gray." It is but a dream, or, twenty years ago I had a horrid nightmare and dreamt of war and woe.

"Why keep alive the hatred that threatens to divide the Union that you value?" I hear on every side. Hatred of what? Did ever the thought occur to you that hatred of an evil keeps alive the good and true?

In my heart I bear no malice toward any class of men. And could kindly recall a "Johnny" on the picket line again? But the principle was cherished and for which we fought and fell. We fought and fell together as comrades and not as enemies.

At Gettysburg you didn't hear the keel of a traitor. That fact to me the spirit underneath the "blue and gray." But the power of the Union was the thunder of the cannon. And the traitor, unyielding courage of Columbia's loyal sons.

When we stood within the trenches, or stormed the rugged heights. We were fighting for the cause of human rights. And truth is all eternal, and can't be made to die. By this sentimental gospel and the logic of a lie.

The precious legacy received at such a price. Too terrible the struggle, too great the sacrifice. Too sacred are the memories of that heroic time. To place the crown of honor upon the brow of crime.

We honor men of courage, whatever be their cause. But the cause they represent will make or mar. I can forgive the madness that raised the mad dog's bark. But to give that hand the power, is more than I can stand.

So I'll stick to my own logic, whatever it may cost. And love my country better and hate the cause that's lost. Give honor to the veterans whose record is on the stars of heaven, and loyalty must die. —J. M. W., in the Madison Journal.

THE STORM.

The Wind, Rain and Electrical Storm of Last Evening.

Numerous Tenement Sheds Wrecked. The Storm in the City and Neighborhood.

An unusual storm of wind and rain set in here at about seven o'clock last evening and continued for over an hour. The afternoon had been very hot—perhaps the hottest of the season—and when the heavy bank of clouds made their appearance in the northwest early in the evening many predicted a storm of unusual violence. At first it appeared to be passing rapidly to the north of the city, until seven o'clock when the wind changed suddenly and the storm came upon us as an instant. The wind was of tremendous force, yet not a hurricane; the rain came down in torrents, and frequent were the flashes of electricity. In fact the heavens at times were brilliantly illuminated with this electrical fire. There was a flood of water in the streets, and the frequent loud peals of thunder served to make the more timid people rather uneasy. Only people were on the streets after the storm predicting terrible destruction to property. The clouds partly broke away at sunset, before the storm had entirely passed in the city, reflecting a fiery glow along the horizon, and a few people who had had their eyes dimmed were quick to report a fire at Edgerton. The storm passed away, and beside the wreckage of a few tobacco sheds in the neighborhood of the city, mostly in the town of Harmony a few miles north of the city, and the bolt of lightning entering the house of A. D. Burnham, who heard of but little damage, scarcely any to the growing crops.

A few minutes before eight o'clock lightning struck the residence of A. D. Burnham, corner of North Bluff and North Fourth streets, second ward. A. D. Burnham has an electric bell, at his residence, attached to the east side fire alarm wire; this wire is attached to the northwest part of his residence—at this point the lightning ran close to the moulding and loosened a few shingles—the bolt then, by some way not discovered, entered the parlor only leaving its mark on the gold room moulding for pictures, destroying and blackening this entirely around the room; thence to the adjoining sitting room; following a like moulding for some distance and disappearing. The inmates of the house, Mrs. Burnham and her sister, did not discover the freak until this morning, although the sudden and brilliant dash of lightning and quick peal of thunder somewhat startled them at the time. Mr. W. B. Stoddard, who resides a few doors beyond, was on his way home at the time, having reached the corner of the street opposite Mr. Burnham's residence and within a few feet of a telephone pole, when the lightning struck. Mr. Stoddard's feet went out from under him and he found himself sitting down on the sidewalk, and imagined some one had hit him on the head with a club. He got up—examined himself, went home and informed his wife that he had been knocked down "by lightning." He complains to-day of having a sore head.

Mr. Earn Dillenbeck's tobacco shed, in the town of Harmony, was wrecked. Mr. Z. Sohnel suffered a like loss.

Eugene Mitchell, Richard Smith, Geo. Grundy, Joseph Grundy, Alfred Austin, and Thomas Rooney, all of the town of Harmony, suffered the loss of their tobacco sheds.

Mr. Lee Beers, residing on Center avenue, second ward, had his tobacco shed, which is 34 feet long, moved about twelve feet and badly wrecked. This shed contained a carriage which was completely destroyed. His other outbuildings were considerably shook up, but without damage. His growing crops were leveled to the ground and more or less injured. Mr. Beers describes the storm as a small whirlwind of less force than a cyclone, yet strong enough to strewn its path with wreckage.

Reports from Johnston and Center state that the rain was very heavy, but no damage to note.

From the town of Rock we hear that a barn was struck by lightning and several head of cattle killed—no particulars.

A Universal of the Electric Light.

Edison has a rival in this city. In an invention of Professor T. S. C. Lova, his incandescent light, which is not electric, is produced by allowing a lighted jet of gas to pass through a glass tube, and a spiral of metal, whose composition has not yet been made public, but which is said to be made of indurated glass. This is heated to a white heat, becoming brilliantly luminous, the gas passing through the tube without flame. There is positively no flickering of the light, as with gas. The cheapness of the gas used in producing the light may be indicated by the statement of the inventor that a unit of every candle-power will cost the consumer but one-quarter of a cent per hour for the gas.
